SPACE**

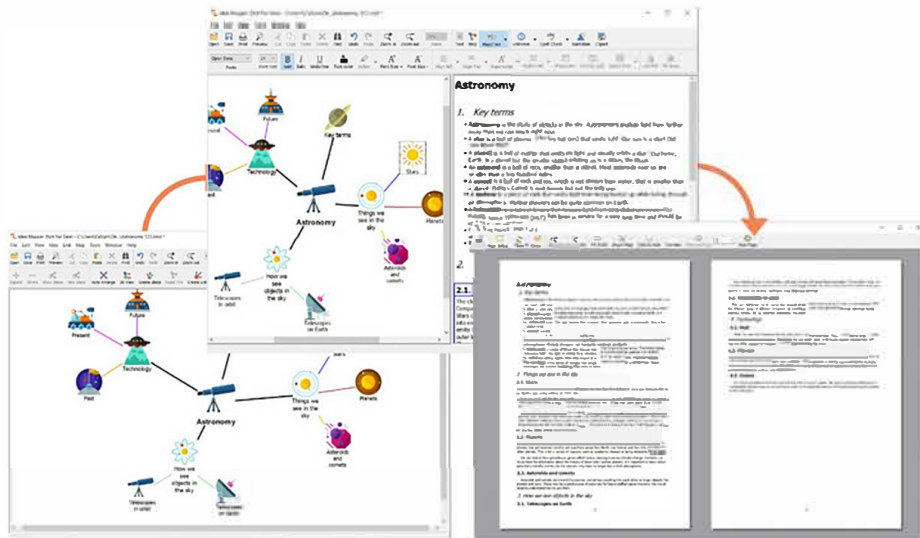

ideamapper (gr 6-12)

- ✓ Next generation visual learning and writing tool
- ✓ Never lose your old maps with unique Inspiration® importer
- ✓ Use one program with built in word processor
- ✓ Compatible with Chrome OS, Windows & macOS

MassCUE offer: per student
1-year \$2.89 each (20+)
3-year \$7.89 each (1,000+)

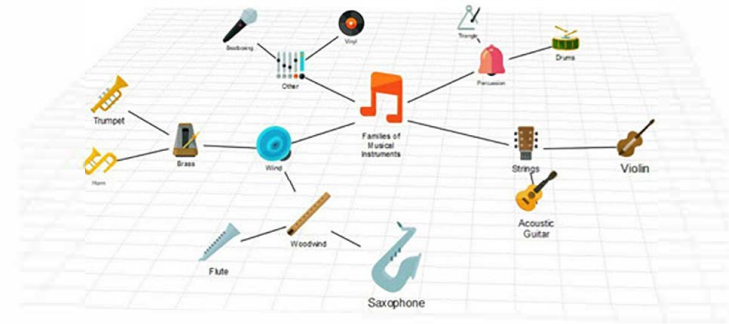

Created for grades 6-12, ideamapper enables students to brainstorm and input creative thoughts via visual mind maps, using these as prompts to create well-structured work.

Using images and icons in maps aids creativity and helps the user to absorb and retain more information.

Combining innovative idea maps with word processing capabilities, ideamapper is a unique and versatile software that captures creativity, increases productivity and broadens understanding.

Benefits of ideamapper include:

- ✓ Improved structure: Whatever you write is structured automatically, with ideas and written content instantly visible in split-screen mode.
- ✓ Time-saving: Brainstorm, structure, write, edit & publish from one single application, and use the 'auto-link' tool to help get thoughts down before they disappear.
- ✓ ideamapper helps the student to focus on specific areas of their work without getting overwhelmed by the detail.
- ✓ Manage information in different forms: Unique 3D view increases interactivity, providing a more tactile sense of the abstract. It also helps visualize the structure of larger maps with ease.
- ✓ Compatible: Easily import and edit Inspiration® documents.
- ✓ 100's of templates for core curriculum. 1000's of modern clip art images included.
