The **2025 MassCUE Fall Conference** is back, bringing together educators, school administrators, technicians and network administrators, tech directors, and edtech innovators —all sharing tools, strategies, and stories that move teaching and learning forward.

This year's theme: Forward is a celebration of the courageous ways YOU are leading change and innovation in your districts and schools.

In today's dynamic edtech landscape, **moving forward means embracing new tools**, **inclusive practices**, and **bold ideas** that empower both educators and learners.

For technology directors and IT leaders, this year's conference features **dedicated tracks focused on A**I, **infrastructure**, **cybersecurity**, **device management**, **interoperability**, and **scalable solutions** for digital teaching and learning.

Connect with peers facing similar challenges, **gain insight** into strategic decision-making, and **explore emerging technologies** that are reshaping the future of education.

Whether you're reimagining instruction or evaluating new tools, building a new school or shaping the future of digital learning in your district, the Fall Conference—taking place Oct. 15–16, 2025 at Gillette Stadium — provides **unmatched access to the people**, **practices**, and **products transforming education**.

Sessions Tailored for IT Professionals

Selected in collaboration with METAA (Massachusetts Educational Technology Administrators Association), these sessions provide targeted learning for Tech Directors and IT staff.

Exploring the Role of an Educational Technology Director: Expert Insights & Guidance

Connecting Forward with E-Rate: Empowering Schools Through Technology
